

Agricultural Plastic Recycling

Lafleche Environmental Inc., in partnership with Recycle Action, now recycles farm plastics at our Eastern Ontario Waste Handling Facility (Moose Creek) and at our Russell Waste Transfer Station.

A container, supplied by Recycle Action, is available for public use at our following drop-off depots:

- Lafleche Environmental Inc. located at 17125 Lafleche Road, Moose Creek, Ontario; and
- Russell Waste Transfer Station located at 211 Corduroy Road, Vars, Ontario.

Some guidelines to follow:

-  Shake the plastic to remove as much dust, hay and other contaminants as possible;
-  Roll the plastic in the shape of a ball – do not use twine or cord to tie it up;
-  Ensure the plastic is free of other waste or contaminants.

The guidelines above are crucial for the recycling projects' success!
